## Site Reliability Engineer (SRE)

Amplify Technologies is a marketing technology solutions developer based in Atlanta, Georgia. We develop and support custom-designed, private-label data, analytics and marketing automation products.

We are seeking a system/software engineer to join our Site Reliability Engineering (SRE) team. The SRE team builds and supports our production and internal systems to ensure the services are available, performant and reliable for our customers and development teams. The engineer we are in search of is a hybrid system and software engineer. Our SRE team is small, so not only do we embrace best-of-class operations and infrastructure processes, we strive to automate as much as possible to improve efficiency and to eliminate errors. We strive to create a DevOps culture by working closely with the development team throughout the software development lifecycle to provide input and feedback on software implementations to ensure they provide the controls and visibility needed to operate them efficiently.

### **As part of the SRE team, you'll be responsible for...**

- Day-to-day availability, performance and stability of the infrastructure and application
- Managing infrastructure changes and code deployments
- Investigating, and possibly correcting, application support issues
- Automating operation tasks and other manual activities
- Implementation of monitoring across the stack
- Providing capacity planning and performance tuning

### **Skills and experience we'd like you to have**

- Multiple years of experience building, troubleshooting and supporting multi-tier web infrastructures
- Proficient with Linux administration
- Expert problem solver
- Familiar with configuration management tools (Ansible, Chef, Puppet, SaltStack)
- Automation experience (infrastructure as code, as well as of manual tasks)
- Experience with scripting languages and coding (Python, Perl, Ruby, Bash/shell)
- Providing off-hours support on a weekly rotating schedule
- Have worked with cloud-based platforms
- Have supported databases (PostgreSQL, Oracle, MySQL, MS SQL)
- Insatiable desire to learn new things, as well as share your knowledge with other team members
- Interface with the development team and participate in the development lifecycle

**The Site Reliability Engineer is a permanent, full-time position requiring residence in the Atlanta, GA area.**

### **Some of the benefits offered include:**

- MacBook Air/Pro
- Competitive compensation
- Robust Healthcare Plan & Long Term Disability
- On-site gym
- Stand-up/Sit-down workstations
- Flextime schedules
- Work-Life balance
- Continuing education reimbursement

If you'd like to be considered for this position, please send an email to [careers@amplifynation.com](mailto:careers@amplifynation.com) with a note about your interest and resume attached.
